

T EACH

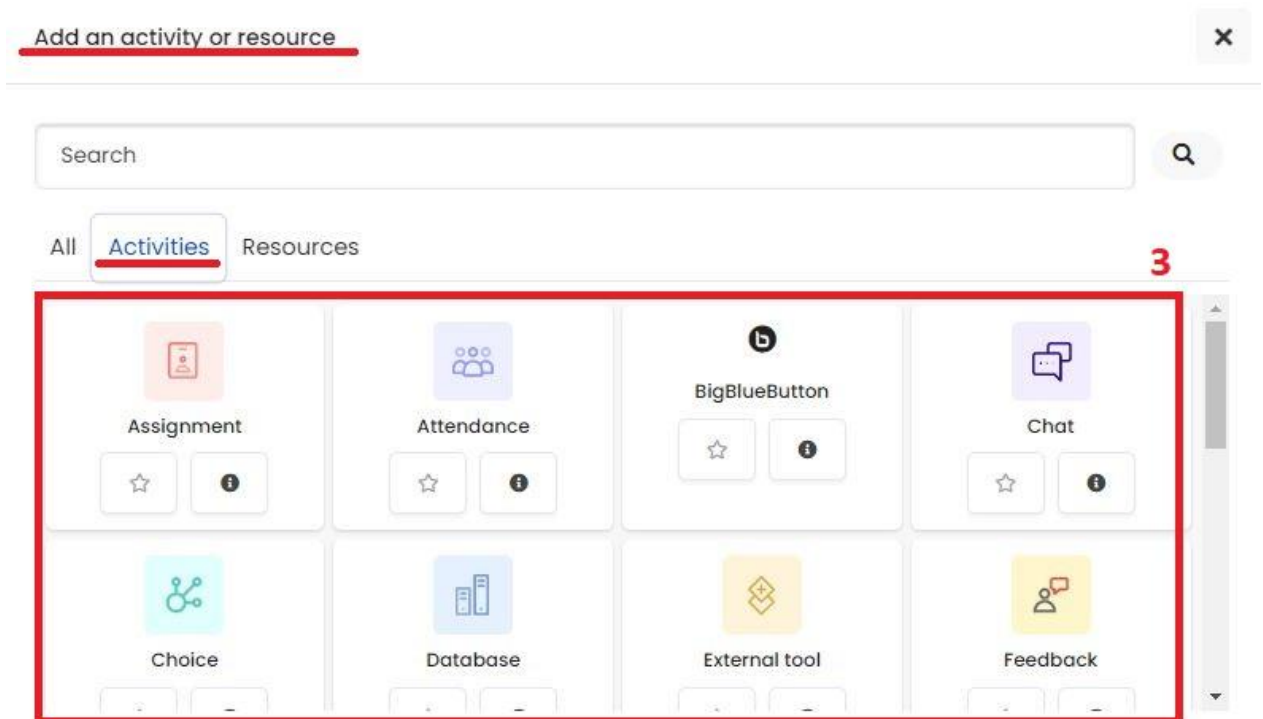

How to add different types of resources and activities to the week/topic?

The screenshot shows the Moodle interface for a course named 'YU-LEARNT'. On the left, a sidebar menu lists various course management options, with 'YULRN101' selected. The main content area features the course title, a 'Duyurular' (Announcements) section, and a 'YU-LEARNT' section. On the right, a 'Course administration' sidebar is visible, containing options like 'Edit settings', 'Users', 'Filters', 'Reports', 'Gradebook setup', 'Badges', 'Backup', 'Restore', 'Import', and 'Reset'. A red box highlights the 'Turn editing on' button, which is preceded by a red '1'.

1- After selecting the relevant course from the left menu and reaching the main page of the course, click the **“Turn Editing On”** button on the right.

- 2- After you reached the editing screen, go to the relevant week or topic and click on the **“Add an Activity Or Resource”** button.

- 3- In the new window that you see, select the **“Activities”** section, and click on the activity you want to add from the menu. (Let's add a demo activity. For example, let's look how to add an **“Assignment”** to the week?)
